

DIPANSHU RANA

Rudrapur, India 263153 | +91-9897979338 | rdipanshu@gmail.com | Portfolio: dipanshu.co.in

SUMMARY

Results-driven Cybersecurity Specialist and Network Security Engineer. Proactive in identifying vulnerabilities using automated scanning tools and AI-driven threat intelligence, deploying critical patches, and optimizing security configurations to safeguard enterprise digital assets. Adept at leveraging modern programming languages (Python, JavaScript, Rust), integrating Generative AI and Large Language Models (LLMs) for automated security workflows, conducting advanced penetration testing with Kali Linux, and driving process automation. Additionally proficient in full-stack web architecture and comprehensive digital lifecycle management, designing secure, high-performance web infrastructures from inception to deployment.

SKILLS

- **Cybersecurity & Threat Management:** Vulnerability Assessment, Penetration Testing, Incident Response, Threat Intelligence, SIEM (Splunk), Intrusion Detection & Prevention Systems (IDS/IPS), Malware Analysis
- **Offensive & Defensive Security Tools:** Kali Linux, Metasploit, Nmap, Burp Suite, Wireshark, SQLmap, Nessus, Acunetix, Mimikatz, BloodHound, Gophish, Lynis, Wifite, Aircrack-ng
- **Network & Cloud Security:** Firewall Administration (Cisco, Palo Alto), AWS/GCP Cloud Security, TCP/IP Protocols, Endpoint Security, Zero Trust Architecture, Network Integrity
- **Technical Proficiencies:** Python, JavaScript, TypeScript, Rust, C, C++, Java, Bash, PowerShell, SQL
- **Web & Application Security:** Web Application Security (OWASP Top 10), Secure Code Review, Custom Security Scripting, Automated Vulnerability Assessments, Bug Bounty Hunting
- **Frameworks & Compliance:** ISO 27001, NIST Cybersecurity Framework, Risk Assessment, Security Auditing, Data Protection
- **Core Competencies:** Systems Architecture, Workflow Optimization, Independent Execution, Thriving in High-Pressure Environments
- **AI Security & Machine Learning Frameworks:** TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers, AI-powered Threat Intelligence (SIEM/XDR), Behavioral Analytics, Generative AI for Incident Summaries, Anomaly Detection Algorithms
- **Web Architecture & Lifecycle Management:** Full-Stack Web Development, CMS Administration, Digital Infrastructure Management, UI/UX Implementation, Web Performance Optimization, Secure Hosting Administration

EXPERIENCE

Information Security

Credwin Pvt. Ltd. - Rudrapur, India | July 2024 - Present

- Provide high-quality cybersecurity consulting and secure infrastructure solutions for government projects, safeguarding the digital assets of Uttarakhand's leading power companies.
- Manage and secure primary critical infrastructure networks, including OT/IT environments, for the Uttarakhand Power Corporation Limited (UPCL) and Power Transmission Corporation of Uttarakhand Ltd. (PTCUL).
- Evaluate the security posture of network expansion projects to establish strict compliance parameters and allocate cybersecurity budgets effectively.
- Ensure full compliance with industry-standard data protection regulations (e.g., ISO 27001, NIST) and maintain a hardened network environment against emerging cyber threats.

Security Operations

Pegasus Enterprises - Rudrapur, India | November 2022 - July 2024

- Executed and managed comprehensive security architecture implementations and threat mitigation contracts across the enterprise.
- Oversaw extensive network monitoring, vulnerability scanning, and managed security resource allocation as the primary lead for internal IT infrastructure.
- Directed the company's enterprise security operations, optimizing threat intelligence distribution networks, and implementing robust firewall policies to drive secure business growth.
- Developed security metrics and analytical reports, improving risk-management decision-making processes for executive leadership.

Freelancing & Web Solutions Architect

Independent Consultant | Contract-Based

- Execute task-based freelance security contracts, specializing in comprehensive penetration testing, vulnerability resolution, and active incident response.
- Perform rigorous web application security auditing, continuous network monitoring, and vulnerability assessments using Kali Linux tools (Burp Suite, Nmap, Metasploit) alongside custom Python scripting.
- Develop automated security scripts and implement machine learning-based threat detection models to enhance overall application integrity and user security for international clients.
- Leverage advanced AI agents and LLMs (such as ChatGPT and Microsoft Copilot) to accelerate vulnerability research, automate secure code reviews, and independently manage forensic analysis deliverables, ensuring high-quality remediation reports.

CERTIFICATIONS & BADGES

Several Certifications and Badges From Leading AI Corporations and universities like: Google Cloud, Amazon AWS, IBM, Anthropic, Cisco, University of Helsinki.

EDUCATION AND TRAINING

Bachelor of Computer Applications

Vivekananda Institute of Professional Studies, Pitampura | June 2021

- Highlight: Core Member of ACE (Association of Computer Enthusiasts), the Technical Society of VSIT.

12th Grade (Intermediate)

Holy Child School, Rampur | March 2018

10th Grade (Matriculation)

Holy Child School, Rampur | March 2016

ACTIVITIES AND HONORS

- **Honor:** Core Member of ACE (Association of Computer Enthusiasts)
- **Honor:** TIME Person of the Year 2006
- **Travel:** Avid mountain traveler and road trip enthusiast
- **Automotive:** Passionate automotive enthusiast with an interest in vehicle maintenance
- **Gaming:** Active participant in online and strategy gaming
- **Interests:** Specialty coffee enthusiast
